URL HELPERS

guided notes

URL HELPERS

What 3 parameters does a URL Helper take?

- 1.
- 2.
- 3.

What does a URL Helper look like? Fill in the blanks

```
<%= link_to _____, _____, html_options = {_____} %>
```

How would you rewrite this HTML link to be a URL Helper:

```
<a href="my_resource_path" class="special-link">This is a link to something!</a>
```

Why would you use a URL Helper?
