FORM HELPERS & SECURITY

guided notes

FORM HELPERS & PARAMS

What is a form helper?

What does a basic form helper look like?

```
<%= _____  do %>

<%end%>
```

What two 'hidden' inputs does Rails include with a form helper, and what do they do?

1.

2.

How would you write a basic form_for helper method for @pin, that has a 'description' field, that is a text area?

```
<%= _____  do |form_builder_object| %>

<%= _____. _____ :_____ %>

<%end%>
```

What are strong parameters, and why are they used in your Rails app?

In what *type* of method do you set your params in your controller file?
