RAILS ROUTES
guided notes

RAILS ROUTES

How is 'Rails Routing' different than routing in Sinatra?

In order to get Rails to generate all the default routes for you, you need WHAT line of code? Fill in the missing code:

```
                :pins
```

You want to change your pins landing page from /pins to /library. In what file do you make that change?

You want to set your homepage to one of your pins#show controller action. Fill in the missing code:

```
                'pins#show'
```
